Pulling Rod Type PZ12S

Pulling Rod Type PZ12A

## Pulling Rod Type

This mini position transducer is designed for direct absolute measurement and available in stroke length up to 150mm. The mini design is suitable for mounting in instruments or machines with limited space.

An improved technique for making correction to resistance track (Double Trimming Technique) ensures the higher degrees of reliability and linearity, while multi-fingers wipers stabilize output signals, even in the most adverse working conditions.

There are three ways of mountings to suit different applications.

PZ12S can be mounted by two adjustable brackets.

PZ12A can be mounted by self-aligning ball joints

PZ12F can be flange mounted
